Explanatory NotesIntroduction

Details of Industrial accidents shown in this bulletin for 1980-81 were derived from reports of compensative accidents occurring during that period.

Accident, data for the year 1980-81 are not strictly comparable with those for earlier periods in some categories, e.g. hernias, previously shown under Sprains and Strains, are now classified to Internal Injuries. Details of the specific changes can be provided on request.

General

Note. Due to the implementation of uniform national classifications for Nature of Injury, Bodily Location of Injury, Type of Accident, and Agency Related to the

In Queensland, workers' compensation insurance is confined solely to The Workers' Compensation Board of Queensland which commenced operations on 1 July 1978. Prior to this date, workers' compensation insurance was

Explanatory Notes (continued)

the responsibility of the State Government Insurance Office (S.G.I.O.). An employer, by a policy issued under the "Workers' Compensation Act 1916-1980", indemnifies himself against all sums for which, in respect of injury to any worker employed by him, he may become legally liable by way of compensation or damages in relation to that injury. Claims made on The Workers' Compensation Board of Queensland are the main source of information on compensative industrial accidents.

Self-employed persons are not obliged to insure, hence a number of workers in primary industry and in the professions etc. are not recorded. Also members of the Australian Government Service, including Australia Post and Telecom Australia, are excluded by the provisions of the Act, and coverage is thereby restricted in the administrative and communications industries. Members of the Police Force, although excluded under the Act, are collected separately and are included in the tables.

By definition, the scope of the collection is limited to include only those injured employees who lost at least a full shift from work as a result of an accident. Accidents occurring during recess periods or on journeys to or from work are not classified as industrial accidents, but some details of such accidents are presented in Table 17. In addition, details of persons who were compensated for a disease arising out of work or the working environment appear in Tables 15, 16, and 17. Cases of occupational disease precipitated or aggravated by some accidental event are classified to the antecedent work injury rather than to the disease.

Definitions

An Industrial accident is defined as any compensated work injury or a compensated occupational disease causing death, permanent disability, or absence of the injured person from work during the entire interval corresponding to the hours of his or her regular shift on any one or more calendar days subsequent to the date of the injury.

Fatal injuries or diseases have been included in the tabulations on the condition that they were accepted by The Workers' Compensation Board of Queensland on or before 31 December 1981.

Permanent disability is an injury or disease which does not cause death but results in the complete loss or loss

of use of any member or any part of a member of the body, or any permanent impairment of functions of the body or part thereof. All permanent disabilities have been tabulated unless rejected for workers' compensation.

Temporary disability is an injury or disease which does not result in death or permanent impairment but renders the injured person unable to perform a regularly established job during the entire time interval corresponding to the hours of a full regular shift. Temporary disabilities are only included in the tabulations if compensation commences within six months of the accident.

Duration of temporary disability refers to the number of calendar days lost rather than to the actual number of working days lost.

Type of accident is the event which directly resulted in the injury, i.e. the manner in which contact was made between the injured person and the object or substance causing the injury.

Agency related to the accident is the agency, i.e. working environment, production equipment, animal, etc., which, because of its hazardous nature or condition, precipitated the event designated as the accident.

Industry classification is according to the Australian Standard Industrial Classification, 1978 Edition.

Occupation classification is according to the Classified List of Occupations, Revised June 1976.

Bodily location of injury refers to the part of the body injured. In cases where there is a major and minor injury resulting from the accident, only the major location is coded. Multiple locations are only coded when there is a major injury to more than one location.

Occupational diseases are classified to the three digit categories of the Ninth (1975) Revision of the World Health Organisation's International Classification of Diseases.

Symbols and Other Usages

- Nil or less than half the final digit shown.
